
Google Classroom/ Google Apps for education

— Time4Us - 31/01/18 —

The future in technology....

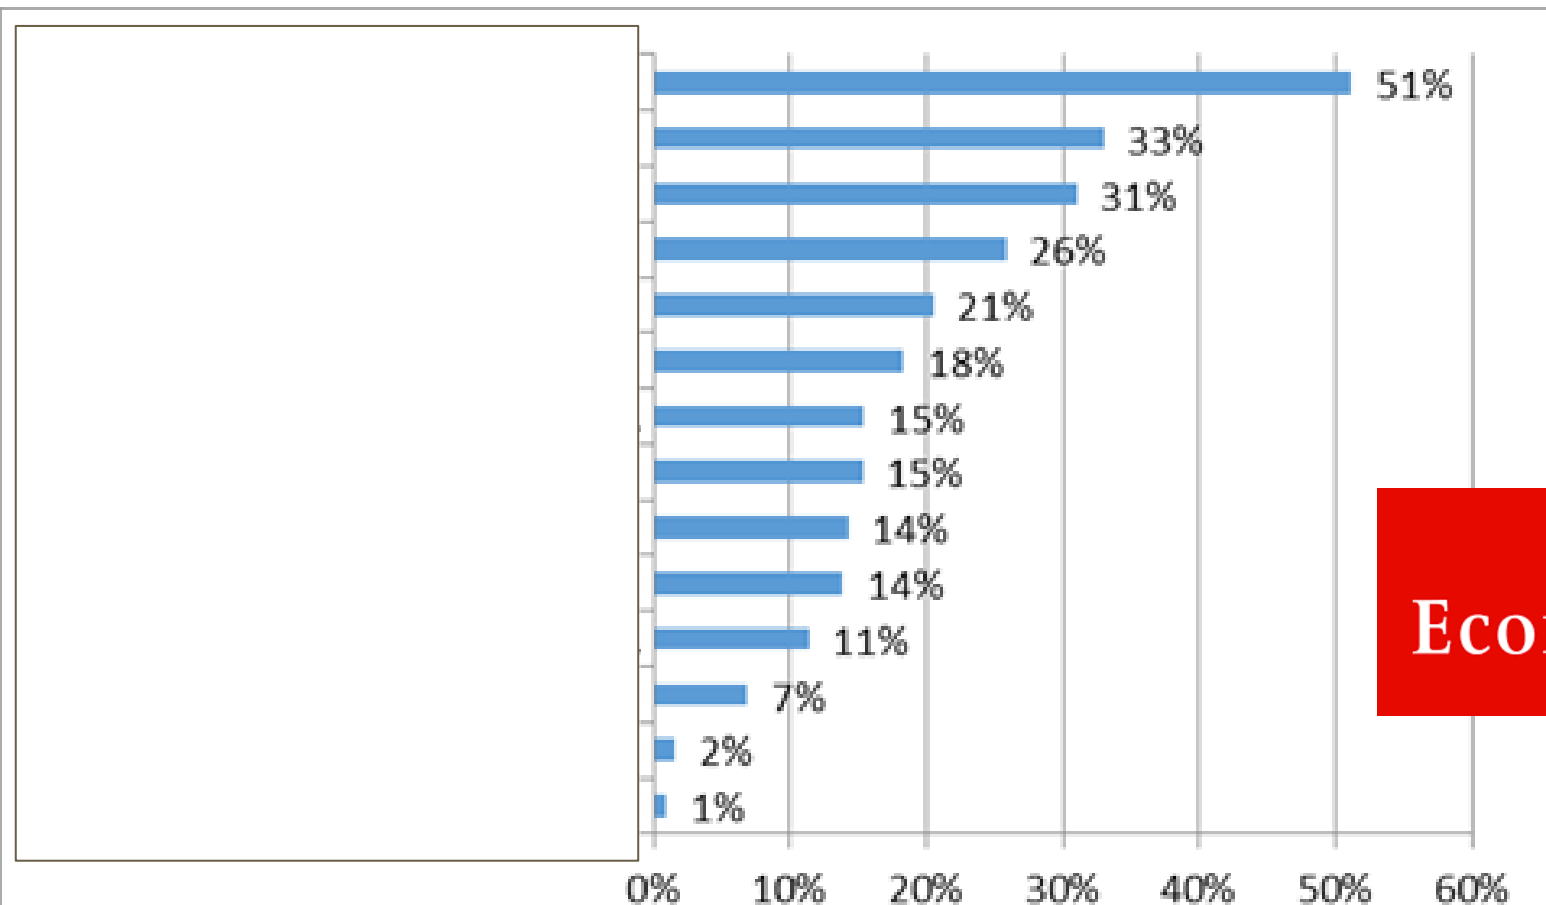

80%

of jobs will require technological skills over the next decade.

65%

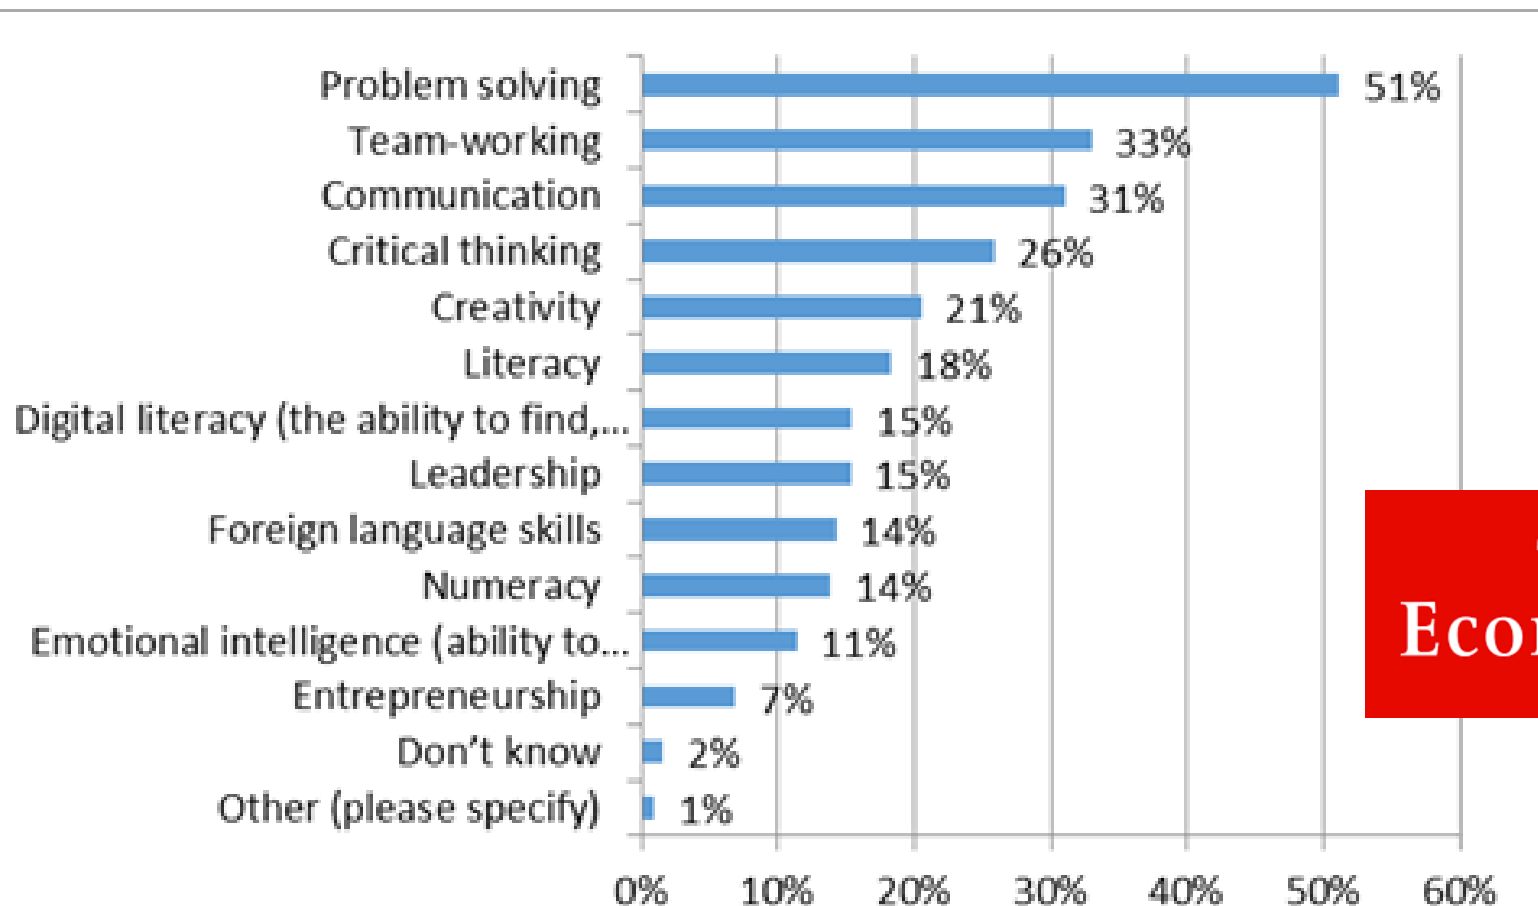

of students will work in jobs that don't exist yet.

Google for education by numbers

Chromebooks are the #1 selling education technology device in the world - and only launched in 2013.

chromebook

30,000+ Chromebooks activated in schools and education establishments everyday

Over 20 million students and teachers worldwide are using Google Classroom.

20 million+ students worldwide use Chromebooks

Chromebooks are the #1 selling education technology device in the world - and only launched in 2013.

Over 70 million G Suite for Education users worldwide

G Suite for Education

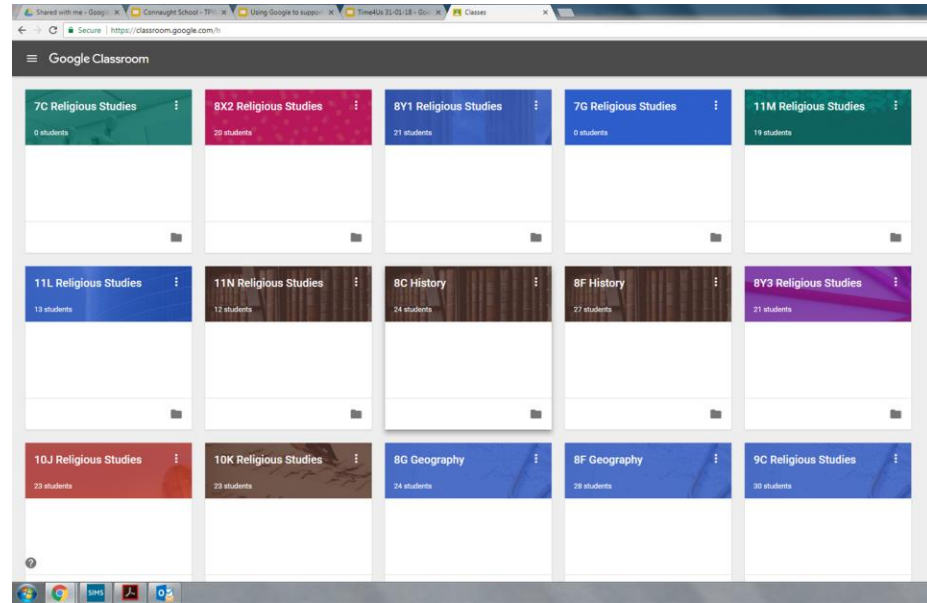

Why are we transitioning to Google?

- HUGE opportunities for students to use the Google cloud/ Google Apps
- Financial saving for parents and school on devices
- Storage for students is UNLIMITED
- Safety / data protection within our domain - fully secure
- Integrity of the school network
- Use of collaborative software/ collaborative work for students
- Teaching students key skills
- Able to use a range of interactive tools to support learning

“This is great... why isn't everyone doing it?”

Firstly - we accept this is a learning process for everyone we don't have all the answers to every possible issue and we can overcome these and learn from them as we go.

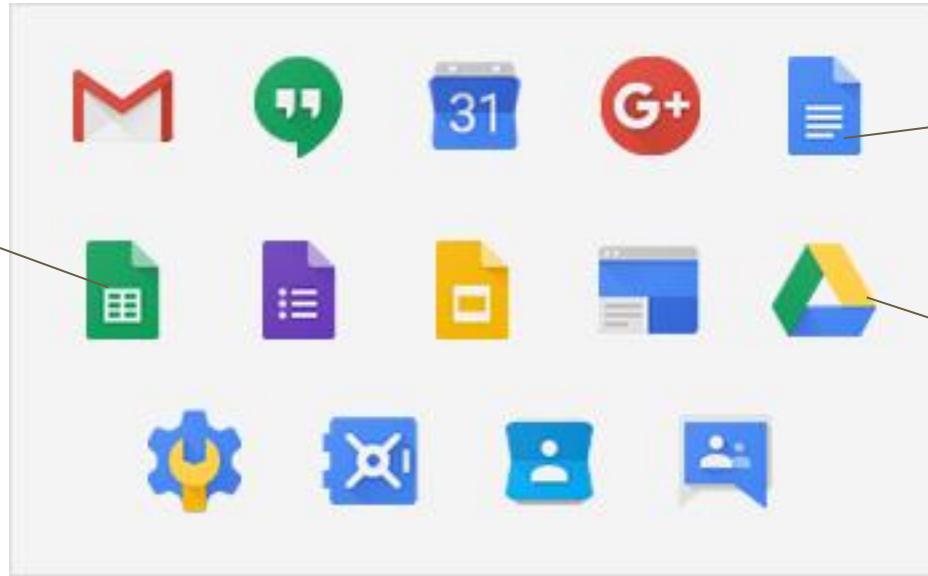

- The students have been given their Google usernames and have access immediately
- Student devices will be converted to run fully as Chromebooks so students MUST be using their Google Drive.
- Student email will be through Gmail and their Google usernames. All alerts will go to their email accounts and all are fully secure through the school monitored and filtered domain.

What can you do?

Have a look on the Google area - your daughter has her usernames and password.

Works just like Microsoft word but saves to Google drive, and can be shared

Works just like Microsoft word but saves to Google drive, and can be shared

Move files to the Google drive and access from anywhere!

The use of the Google account will replace the school network, and all work needs to be saved to their Google drive.

Google Classroom in action...

For this I will need to move to the laptop to give a brief demonstration of Google classroom, how it can operate and the learning tools available to staff and to students.

Mr Silks Classrooms

Connaught Hardware changes

New set of Chromebooks

Current devices will be 'converted' to run as Chromebooks.

Your own hardware changes?

Purchase simple Chromebook from £160 (Averages 61% cheaper to buy and maintain than Windows and Mac devices)

Convert old machines to run FAST on Google Chrome OS.
